Portfolio

Summary

Results-driven CS Engineering student with hands-on experience in SQL, Python, Power BI and Excel. Proven ability to build data-driven projects and extract actionable insights from complex datasets. Seeking an entry-level Data Analyst role to contribute analytical skills and support data-informed decision making.

Skills

Data Analytics & Tools: Power BI, Tableau, Excel, Python, Jupyter Notebook, MS SQL Server

Soft Skills: Problem Solving, Team Collaboration, Communication, Time Management, Multi-tasking

Education

Malla Reddy Engineering College and Management Sciences, MREM

Aug 2023 - Present

Bachelors in Computer Science Engineering | CGPA: 7.64/10.0

Government Polytechnic College, Nalgonda

Aug 2020 - Apr 2023

Diploma in Electrical and Electronics Engineering | CGPA: 8.33/10.0

Experience

Generative AI Intern

May 2025 – July 2025

BrainOvision Solutions Pvt. Ltd., Hyderabad

- Completed a 2-month internship focused on Generative AI concepts, model workflows, and real-world AI project implementation.
- Applied practical knowledge in AI model development, prompt engineering, and data processing during the internship period.

Projects

E-Commerce Database Design

[Source Code](#)

- Designed a relational database schema with 9 core entities including users, products, orders, payments, and inventory, improving data organization and scalability.
- Developed 10+ optimized SQL queries for sales reporting, customer segmentation, and inventory analysis, reducing query execution time by 30% using indexing and normalization.

Online Car Rental Management System

[Source Code](#)

- Developed a full-stack car rental platform supporting multiple concurrent users, with features for vehicle search, booking, and availability management.
- Built backend reporting modules to track 100+ rental records, user activity, and vehicle status using Django, SQL, HTML, CSS, and JavaScript.

Multi-Scale Deep Learning Framework for Surface Defect Detection

[Source Code](#)

- Built a CNN-based defect detection model achieving 98%+ accuracy in identifying surface faults, reducing manual inspection effort by 40%.
- Trained and evaluated the model on 1,000+ image samples using Python, Scikit-learn, and deep learning frameworks.

Certifications

- Web Development Training - Internshala, Dec 2024
- Data Visualization with Python - IBM Developer Skills Network, Jun 2025
- AWS Certification Course - Intellipaat, Jun 2025
